

BizDock R15 Release Note

Initiative resources: Add monthly allocations for employees on an initiative

The “Manage allocated employee” form (cf [Planning](#) help section) has been updated with a new checkbox “Monthly allocation”. Ticking this checkbox will replace the allocation “Start date” and “End date” fields by a view by month as displayed in the adjacent printscreen. The sum of the days will still be displayed in the “Days” field of the form and in the summary table.

The screenshot shows the 'Manage an allocated employee' form. It includes fields for Employee (Dev James), Role (Developer), Package, and Days (26). A 'Monthly allocation' checkbox is checked. Below it is a calendar view for 2017 with days 5, 8, 3, and 10 allocated to January, February, March, and April respectively. A 'Save' button is at the bottom.

Roadmap: Add a view by employee in the capacity table

A new tab has been added in the “Capacity table” view of the “Roadmap” page. This new table displays the current allocations and capacities of all the employees associated to the selected initiatives in the Roadmap. The same color code is used as in the other tables, that is:

- red for employees whose allocation overpass their capacity for the given month
- yellow for employees whose allocation overpass their capacity for the given month by less than a day
- green for employees whose allocation do not overpass their capacity for the given month

When selecting a cell in the table, the details of the month is displayed below. The detailed gives the list of initiatives which the employee is assigned to with the number of days and wether the allocation is confirmed or not. On the right side, a bar graph consolidate the allocations per initiatives.

Initiative documents: Add a page to manage all the documents associated to an initiative

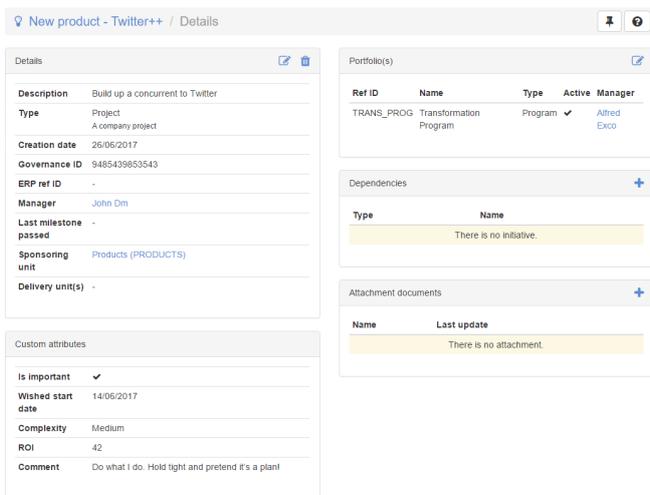

A new page has been added in the “Status reporting” section of an initiative. This page displays all the documents attached to the current initiative with the following information:

- the document's name
- the document's type (initiative's document, report, ...)
- the document's date of last update
- a link to access the page where the document has been uploaded
- a link to directly download the document
- a link to remove the document

Custom attributes: Group custom attributes by category and display in separate panels

Custom attributes are now displayed in separate panels throughout the application and can be categorized by groups. Custom attributes in different groups will be displayed in their own panel in display and edit modes.
